EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

2. Authorization for this examiner's amendment was given in a telephone interview with Adesh Bhargava on 02/23/05.

3. The application has been amended as follows:

In Claim 19, in line 8, delete “, optionally,”

In Claim 19, in line 9, delete the last comma

In Claim 19, in line 10, delete “optionally,”

In Claim 39, replace lines 8 and 9 as follows:

-- a third step, in which a sensor holder is automatically selected from a plurality of available sensor holders of differing characteristics and an associated sensor is assigned to each of the objects to be X-rayed--

In Claim 42, in line 3, delete “preferably an X-ray image”

DETAILED ACTION

Drawings

4. The drawings were received on 01/19/05. These drawings are not compliant for the reasons set forth in the Office action dated 09/21/04. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because the drawings appear to be shaded more darkly than the original drawings and do not reproduce well. See 37 CFR 1.84(m). Applicant is

Art Unit: 2882

advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Allowable Subject Matter

5. Claims 19-37, 39, 40, 42 and 44 are allowed.
6. The following is an examiner's statement of reasons for allowance: Claims 19-37 remain allowable for at least the reasons set forth in the Office action dated 09/21/04. Claim 39 contains allowable subject matter for at least the reason that the prior art of record fails to teach or reasonably suggest a method of specifying a sensor holder for the creation of an image of an object, wherein the sensor holder supports a digital sensor of dental X-ray apparatus comprising displaying, selecting from a display and automatically selecting a sensor from a plurality of differing sensors as claimed. While displaying and selecting display objects is known in the art, the combination with automatic selection of a sensor holder from among different sensor holders is not suggested. As shown by art such as Ciaciosi (US 6,652,141) and Carroll (US 6,527,442) a user selects a sensor and sensor holder for the X-ray procedure and no mention is made of the automation of the selection.
7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
